How to set Wi-Fi eduroam on Linux Devices

Before you begin: To successfully connect to the eduroam network, it is necessary to have a pre-set password. *It is not a password to CAS*, but it is set separately in CAS. If you do not have a password for eduroam set or you are not sure, log on to <u>https://ldap.cuni.cz</u> and in the section *Other accounts / Set password for eduroam realm cuni.cz*, set a password or find out the current one.

Start Simply With a CAT Script

Tip: If you don't have an internet connection, you can download the CAT script on another device.

1. Launch your web browser and go to:

https://cat.eduroam.org/

2. Click on the large blue button to select profile for your institution:

3. Find and select your institution in the list. You can use serach box:
