
Information System Study Development Department

Leader: Mgr. Ing. Petr Mikeš

Scope of work:

The department provides the role of an integrator during development, implementation and administration of the service-oriented Study Information System's (SIS) architecture

- performs IT analysis of SIS development requests in close cooperation with the Business Analytics Department,
- coordinates the creation of the SIS data and object structure and defines their links,
- prepares concepts of solutions for individual software modules in the SIS, ensures request assignment to SIS providers and coordinates their work during implementation and testing.
