
Smart Campus and Integrated Services Department

Leader: TBD

Scope of work:

- to serve as a technological and coordinating pillar for the development of digital infrastructure, service automation and interconnection of the physical and digital environments of the university,
- to prepare and develop the Smart Campus concept,
- to provide the architecture for interconnecting various systems and agendas (study, personnel, economic, mobility) into a unified user environment,
- to search for and support digital services with added value for students and employees,
- to develop mobile applications for accessing campus services (schedules, canteens, navigation, notifications and more), including integration in the deployment of chatbots and campus orientation assistants, reservations, FAQ.
