
Eduroam - client reconfiguration required

It is necessary for you to reset your WiFi profile using the tools mentioned below **before the server certificate exchange date, 16th September 2026, otherwise your connection to the eduroam network will stop working!**

The easiest way is to use the [eduroam CAT](#) tool or <https://geteduroam.app/> .

These tools will set up your WiFi profile on your device so that your connection to the eduroam WiFi network will continue after the certificate exchange. You can also use the instructions at <https://eduroam.cuni.cz/en> .

When you reset your WiFi profile, you will need your "**eduroam password**" (network password), which you can view or reset in **CAS CU**: <https://ldapuser.cuni.cz/domain/eduroam>

If you run into any issues, please contact support via [ServiceDesk](#) .

Thank you for your understanding and cooperation.
