Network services

University network can be accessed via the following services:

- WiFi at the Charles University (eduroam, uk-visitors,uk-events, uk-simple)
  The **eduroam** *WiFi network is available in most university buildings. It can be used by students and employees of the Charles University and other related organisations. This WiFi network is the result of an international project focusing on supporting mobility and roaming within National Research and Education Networks (NREN).*

- JINONICE domain
  Every student or employee of the Charles University in Prague *can acquire a user account in the JINONICE domain and use its services.*

- •Network access for employees of the Rectorate of the Charles University
  Employees of the Rectorate of the Charles University *, of the* Computer Science Centre and Premises *and* Facilities Administration *are entitled to an account in the domain of the Computer Science Centre and can thus use related services offered by the Computer Science Centre.*

- Administration of network services
  We are happy to provide consultations and help in solving administrative tasks related to assigned ranges of IP addresses and the running of basic network services.
