
How to connect - Windows 10

How to connect - Windows 10

These instructions describe settings of Windows 10 operating system for connection to the wireless network **eduroam**. It is assumed that the user has the wireless network card drivers installed (mostly by the notebook manufacturer). Current driver version is recommended.

It is also assumed that the user's eduroam account is functional. Otherwise see the information available at [this page](#).

Automatic configuration

You can use automatic configuration program [eduroamcuni3.exe](#).

After running this program select the *eduroam* network, click connect and enter your username (including realm) and password.

A screenshot of the Windows 10 Sign in dialog box. The dialog has a blue background and a white title bar that says "Sign in". Below the title bar, the text "Sign in" is displayed in white. There is a grey square icon with a white person symbol. Below that is a text input field containing "12345678@cuni.cz". Below the text input field is a password input field with black dots and a white eye icon on the right. Below the password field, the text "Domain: cuni.cz" is displayed. At the bottom right, there are two buttons: "OK" and "Cancel".

If this program doesn't work, please follow the instructions for older operating system [Windows 8](#) .

Username and password will be saved after a successful login and for the next connection it is not necessary to enter again the name and password.

Note the [supported services](#) . If something does not work, first consult the [supported services](#) page and make sure whether the operation is allowed within the network.
